

# COVIDSafe Plan

## Template for International Sport Travel

## PURPOSE OF THIS DOCUMENT

This template has been developed to provide a consistent, practical and simple means of developing a COVIDSafe plan for your sport in preparation for travelling internationally. This provides a framework covering the key risk mitigation issues that need to be addressed in a COVIDSafe plan. The information to populate this template can be drawn from a number of sources including but not limited to;

- > [COVIDSafe Plan Information for High Performance Camps document.](#)
- > [AIS International travel for sport information sheet.](#)
- > Other relevant public health websites as required.

Public health directions will at all times take precedence over sports COVIDSafe Plans.

## COVID-19 VACCINATIONS

The Federal Government has announced a [COVID-19 vaccine national roll-out strategy](#). This prioritises at-risk workers and medically vulnerable individuals in a stepwise fashion. Some members of the Olympic and Paralympic Teams may be prioritised due to their own work or health circumstances. Whether all the Olympic and Paralympic Team will be vaccinated prior to the Games will depend on the timing and efficiency of the vaccination roll out program. It is preferable for the Olympic and Paralympic Teams to be vaccinated prior to the Games if the opportunity for vaccination arises. Vaccination may not be appropriate for some athletes due to underlying health conditions. It is not compulsory for athletes to be vaccinated in order to attend the Olympic or Paralympic Games.

## COVIDSAFE OFFICER

# INTERNATIONAL TRAVEL, INCLUDING FOR TOKYO

Ground transport

Airports

Air travel

Duration of international stay

Travelling with a doctor

Size of touring group

Personal protective equipment
